EventBrain AI

The Intelligent Event-Saver

by Team Rolex

Meet the Team behind EventBrain

Sharma

Backend Developer

Handles Intake Agent, Vendor Intelligence Agent, and Risk & Conflict Agent development

Ruben Raj

Frontend Developer

Built the user interface, interactive flows, and responsive components

Kishant

Backend Developer

Handles Email Drafter Agent, Event Execution Agent, and Crisis Management Agent development

Sanjeevan

Integration and QA Testing

Ensured seamless integration of all agents, conducted comprehensive testing, and validated system reliability

Haresh

Database Architect

Designed and optimized the database architecture, ensuring scalability, performance, and data integrity across all systems

✔ Driven by a shared frustration with broken event workflows.

Validating the Problem with Data

Time & Budget: The Twin Crises

According to a survey by EventMB, 49% of event planners cite time management as one of their biggest challenges, while 40% say managing event budgets is a key concern. Nearly half of all corporate event planners globally are drowning in scheduling conflicts and budget decisions. EventBrain AI solves both in one message.

The Vendor Management Nightmare

29.6% of event planners point to increasing vendor costs as a key obstacle, and a single event coordinator is typically responsible for juggling anywhere from five to ten vendors per event. Almost 1 in 3 planners are struggling with vendor costs. When a vendor cancels—which happens—most coordinators have no system to respond fast. EventBrain's crisis agent handles that in seconds.

The Event Management Crisis

40+

Events Per Year

Internal & external events managed
by a typical company annually

25hr

Lost Per Event

20–30 hours wasted on manual
coordination, vendor calls, and
budget conflicts

3x

Error Rate

Double-bookings, vendor
mismanagement, and missed
deadlines under manual workflows

Why Should We Care?

The Real Pain Points

Companies worldwide organize **30–50+ events every year** — from team buildings and festival celebrations to awards ceremonies and corporate workshops. But when everything depends on manual coordination, the cracks show fast: missed details, last-minute chaos, and mounting pressure on already stretched teams.

Lost Oversight

Without one clear view of vendors, budgets, and deadlines, small issues quietly snowball into costly mistakes and avoidable fire drills.

Burnout

Event teams are trapped in a nonstop cycle of urgent requests, broken follow-ups, and crisis management that drains energy fast.

Missed ROI

When time is eaten up by manual work, the event loses momentum, impact, and the business value it was supposed to create.

✦ OUR SOLUTION

EventBrain AI – The "Aha!" Moment

A Gemini-powered AI assistant that understands natural language event requests, resolves conflicts autonomously, and orchestrates vendor decisions in real time.

Unstructured Input

"Plan a 50-person team building next week, budget RM5K" — EventBrain understands it instantly

Autonomous Resolution

- Budget conflicts, vendor clashes, and schedule changes resolved without human bottlenecks

Real-Time Crisis AI

Weather disruptions, no-shows, venue issues — EventBrain adapts and replans on the fly

See It in Action

Core Features Demo

Intake Agent

Captures and understands natural language event requests.

Email Drafter Agent

Creates professional stakeholder communications automatically.

Vendor Intelligence Agent

Finds and matches the best vendors to each event brief.

Decision Agent

Makes autonomous vendor and resource allocation decisions.

Risk & Conflict Agent

Detects scheduling clashes and budget issues early.

Crisis Agent

Handles crisis management, detects issues in real time, and automates responses to event disruptions.

Your Event, Reimagined: The EventBrain AI Flow

Experience event management transformation from initial request to flawless execution, all powered by intelligent AI.

Natural Request

Simply describe your event needs in plain language. EventBrain AI understands your intent instantly.

The 6-Agents Workflow

EventBrain processes the request, checks for conflicts, and auto-generates a comprehensive event plan.

Real-Time Oversight

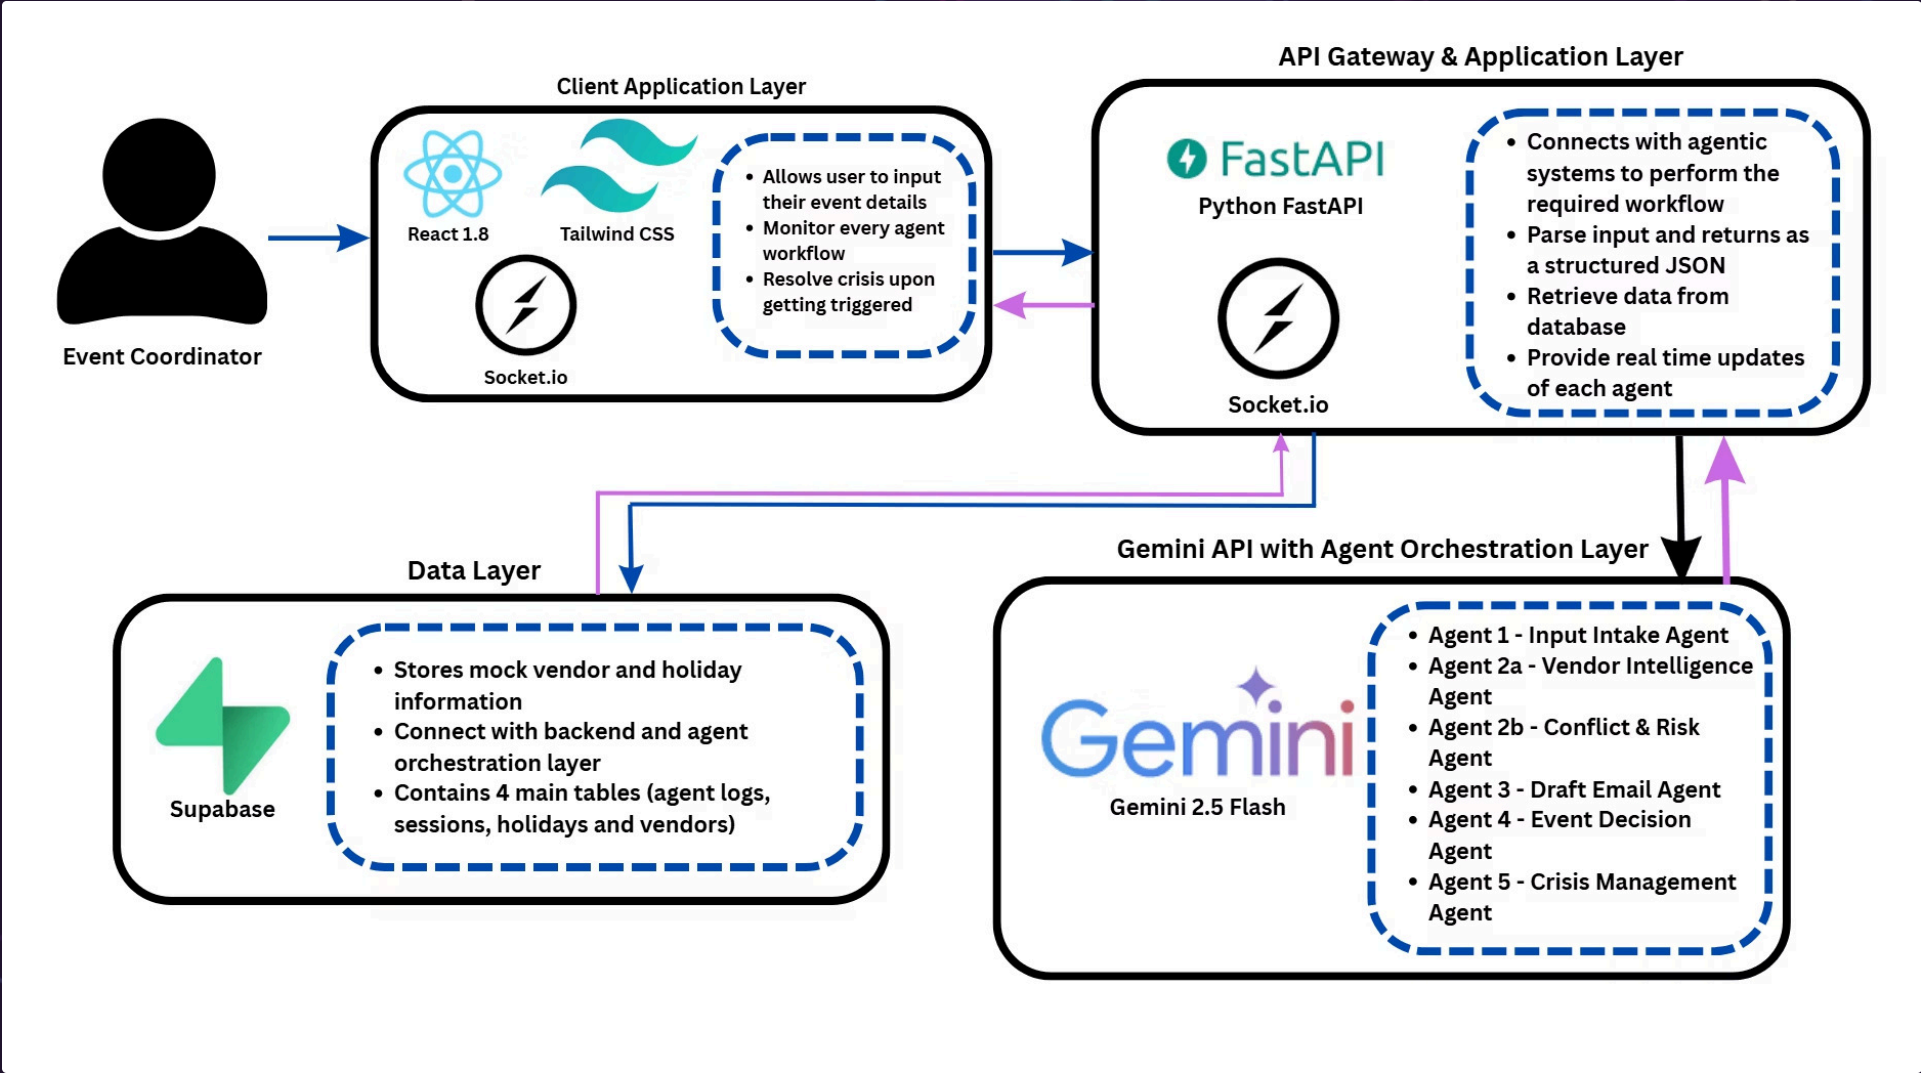

Access a dynamic dashboard showing live updates on budgets, vendor statuses, and timelines.

Automated Crisis Response

EventBrain AI proactively detects issues and offers alternative solutions, ensuring smooth event continuity.

How We Built It

Impact & Future Potential

Time Saved

Reduce per-event coordination time from **25 hours to under 3 hours**

Cost Efficiency

Smarter vendor negotiation and budget allocation — **15–25% cost reduction** per event

Scalability

SaaS model targeting HR and corporate admin teams globally

Quantifiable Impact: EventBrain AI in Action

EventBrain AI delivers tangible, measurable results that transform event management from a burden into a strategic asset.

88%

Time Savings

Reduce per-event coordination from **25 hours to under 3 hours**

15-25%

Cost Reduction

Smarter vendor negotiation & budget allocation per event

70%

Error Reduction

Minimize double-bookings, vendor mismatches, and missed deadlines

3x

Productivity Boost

Empower teams to focus on strategy, not manual tasks

Accelerated

ROI Improvement

Maximize event value & align with business goals more effectively

DEMONSTRATION

EventBrain AI: See It in Action

Let's dive into a live walkthrough to experience the power of autonomous event management firsthand.

Thank You

We're deeply grateful for your time and interest in **EventBrain AI**. It has been a privilege to share our vision with you, and we're excited about the opportunities ahead.

Thank you for being part of this journey.
